═══ PASSWORD SECURITY AUDIT REPORT ═══

Dictionary Generated Based on User Patterns
Total Words: 5

Dictionary Attack: FAILED

Brute-Force Attack: SUCCESS
Recovered Password: abc
Time Taken: 0.0 seconds

Password Strength Analysis
Length: 7
Uppercase: False
Lowercase: True
Digits: True
Symbols: True
Entropy: 42.61
Rating: Moderate

═══ RISK SUMMARY ═══
Overall Risk Level: MEDIUM RISK

═══ SECURITY RECOMMENDATIONS ═══
- Use minimum 12-16 character passwords.
- Include uppercase, lowercase, digits, and symbols.
- Avoid personal information (name, DOB).
- Implement account lockout after failed attempts.
- Use multi-factor authentication (MFA).
